DETAILED ACTION

This Office Action is in response to Applicant's paper filed 2-25-05, which has been entered and considered. Claims 6-15 are currently pending.

Specification

Applicant's Amendment to specification, filed 2-25-05 has been entered and is acceptable to Examiner. The objection to the title, made in prior Office Action is hereby withdrawn, subsequent to Amendment by Applicant in paper filed 2-25-05.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance for claims 6-15:

The prior art of record does not teach or disclose or make obvious a method of fabricating a semiconductor device, comprising inter alia: forming an oxide layer, an aluminum layer, and an interconnect stress-relief layer in sequential order onto a metal interconnect. Examiner agrees with Applicant's arguments that the interconnect of Kub would not be properly combined with the claimed oxide, aluminum, and stress-relief layers of Ramdani. Ramdani discloses a metal oxide layer upon a silicon substrate which is used as a silicate seed layer or an interface between the substrate and subsequent growth of monocrystalline alkaline-earth metal oxide layers (col.3 lines 12-13). Therefore, Ramdani would not be motivated to form an interconnect between the

substrate and these layers. Subsequent to an updated search of the relevant prior art, this application is therefore allowed for reasons deemed to be of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
